

## TERRACE LANDSCAPE DESIGN | BEYOND GREEN

Customized blue terrazzo floor echoing the sky and the moon light forms a monolithic plane to dance and dine. The bench quietly moulds itself as a sculptural entity along one edge of the parapet wall. The stucco wall reinforces Moorish character of the space with the planting providing the foreground to the wall. The trees are strategically located to add as sculptures because of their branching pattern.

A Rusted breakfast table is located towards the east overlooking the skyline of Ahmedabad.

The Landscape is minimalistic in its character and ensures that the terrace is hand crafted to allow for multiple activities.
